PERSONAL PROFILE STATEMENT

I have always had a natural and keen interest in technology and innovation. I am passionate about web technologies, data science, web development and smart systems as far back as I can recall. As a result of this passion, I have always tried to understand how to develop and scale up systems to suit businesses, personal or institutional use. My academic qualifications and professional experience in the aforementioned roles and personal projects have prepared me for a career in the information and technology services industry. This led me to acquiring the training and background in Computer Science to assist in solving and providing solutions, at an honors level.
